On the evening of Wednesday 27 May, Tarneit College held their first Mathematics Family Fun Night. It was amazing to see such a turnout of students, siblings, parents and guardians as they walked through the doors, eager with smiles, to begin their Scavenger Hunt.

The teachers and staff at the College would like to express their thanks in making the night one to remember and the beginning of a great tradition at the College to engage parents with their young people in the learning of Mathematics and Numeracy.

Mathletics is a great learning tool that students at Tarneit College utilize within the classroom but so too do the students have access at home to consolidate and challenge new skills. In the photo to the left, parents learn how they can support their young person with confidence in different topic areas and most of all, how to use the program affectively.

The surrounding photos show proud parents and enthusiastic students engaged in their learning with members of their families. The night was undoubtedly one that followed the College Values of Pride, Inclusiveness, Responsibility & Learning.

On behalf of the staff at TPgC we thank you for your participation and involvement on the night and look forward to 2016.

Mr. Chris Daxecker & Ms. Laura Smethurst
